

COLO-RÈ

Coloured revitalising sealer for concrete

Description

COLO-RÈ is a solvent-based product developed to renovate and colour concrete surfaces. It is particularly suitable for stamped/imprinted and decorative floors.

Features

- Easy application
 - Matt (opaque) and veiled effect
 - It can be applied on Ideal Sealer (solvent-based acrylic resin) without prior sanding.
 - High yield
 - Spray applied
-

Fields of Use

- Refreshes and renews the colour of old concrete surfaces
 - Protects concrete surfaces from UV rays, abrasion and stains.
 - Diluted with Ideal Sealer Medium, it gives the surface coloured glazes and shades.
 - Can be used to change the colour of existing concrete horizontal surfaces.
-

Application

Preparation

The application must only take place on concrete surfaces that are completely dry and free of, oil, grease, paints, waxes and any other product that can inhibit penetration and adhesion to the surface including anti-evaporation membranes (CURING) that are not compatible with Ideal Sealers

COLO-RÈ should never be applied in the event of rain or when rain is expected within 3 hours.

NEW CONCRETE SURFACES

It is sufficient to wash the surface very well and let it dry for 12-24 hours. It is recommended to wait at least 10 days after casting the concrete slab.

OLD CONCRETE SURFACES

If the floor has previously been treated with Ideal Sealer, it must be washed with a mono brush (buffer machine) with a PVC disc or with pressure washer and IDEAL STRONG. In the presence of other types of resins / sealers, a light sandblasting (with bicarbonate) or the use of EASY STRIP paint stripper is recommended.

Application

Mix well before use.

COLO-RÈ can be applied in 1 or 2 coats with an airless pump. The second coat should be applied when the first is dry, generally not earlier than 3 hours.

After colouring, apply a coat of Ideal Sealer Regular, always by spraying. Do not use a roller as this could damage the coloured layer underneath.

COLO-RÈ can be applied undiluted with a covering effect to radically change the colour of the slab or to cover existing stains

Normally COLO-RÈ is used diluted with Ideal Sealer Medium to revive the colour, create new shades or give an antiqued effect to an old concrete floor.

For example:

INTENSE SHADES: 5 L COLO-RÈ + 2.5 L IDEAL SEALER MEDIUM

MEDIUM SHADES: 5 L COLO-RÈ + 5.0 L IDEAL SEALER MEDIUM

LIGHT SHADES: 5 L COLO-RÈ + 7.5 L IDEAL SEALER MEDIUM

It is also possible to mix the different colors together.

Technical Information

COLO-RÈ is available to order in colours from the NCS chart for a minimum quantity of 5 L.

Consumption

Approximately 100 g of mixture per m². The consumption of COLO-RÈ depends on the dilution ratio and substrate density/absorption capability.

Packaging / Storage / Disposal

COLO-RÈ is available in 5 L jars.

Stored in the original container at a temperature between 5°C and 30°C, it has a shelf-life of 24 months. Store in a ventilated place. Do not freeze.

Precautions

COLO-RÈ can only be used on concrete or cementitious materials. It must never be used in areas subject to the constant presence of water, aggressive chemical exposure, abrasion, rubbing or passage of metal wheels.

The product is flammable. Avoid contact with skin, mucous membranes, eyes etc. In case of accidental contact, wash thoroughly with soap and water and consult a doctor. The use of protective masks and gloves is recommended. In closed rooms, provide good ventilation and avoid inhalation of vapours.

Consult the safety data sheet.

IMPORTANT

All information contained herein is based on the best and most recently available practical and laboratory testing. It is the customers responsibility to determine that the product is suitable for their chosen application. The manufacturer assumes no responsibility for the results
