

## IDEAL CARE (cod IDEAL\_CARE1)

### Protective wax for interior decorative cement-based coatings

---

#### **Description**

IDEAL CARE is a water-soluble wax suitable for the maintenance of cement-based internal decorative coatings.

---

#### **Features**

The regular use of IDEAL CARE diluted in water on Ideal Work decorative surfaces creates an invisible protective layer that helps keep its chromatic and aesthetic characteristics unchanged over time.

---

#### **Uses**

IDEAL CARE **is suitable for use on Ideal Work internal floors**

- Microtopping
- Architop
- Lixio e Lixio Plus
- Nuvolato concrete floors

---

#### **Application**

Wash the floor thoroughly with neutral detergents or, preferably, with the dedicated detergent Ideal Work PERFECT. Dilute IDEAL CARE in cold water 1:5 (five full glasses in 5 L of water) and spread the liquid with microfibre cloth, wax-spreader or with single-brush buffer machine. A monthly application is sufficient for ordinary pedestrian traffic.

---

#### **Technical Information**

Colour	colourless
Odour	odourless
PH	7,5

---

#### **Consumption**

120 m<sup>2</sup>/L product (diluted 1:5)

---

#### **Packaging / Storage / Disposal**

In 1 L canister

---

#### **Precautions**

Testo  
See SDS

---

#### **IMPORTANT:**

The manufacturer disclaims any responsibility for the achievement of the services declared for the system and for the success of the work if it is performed even partially in contrast with these guidelines or with products not covered by them.

The manufacturer also declines any responsibility for the aesthetic aspects of the flooring which depend on installation methods, working times and thermo-hygrometric conditions on site at the time of application which the applicator must consider during the installation process.

The applicator must note that Ideal Work is in no way responsible for the suitability of the solution chosen in relation to:

a) Conditions prevalent during application including substrate suitability, thermo-hygrometric conditions or any other parameter which may affect the performance of the Ideal Work products in use.

B) the stresses to which Ideal Work products may be put under in use.

It also notes that the indications provided by Ideal Work in its technical documentation are to be considered necessary but do not in any way relieve the contractor of the responsibilities and technical evaluations of the applicator. The data can be changed at any time.

Also note that the products are intended for professional use only.
